About us

Lingaro was created in Warsaw, Poland by a team of managers and consultants who acquired their experience by working together at Hewlett-Packard and Procter & Gamble. Our in-depth expertise in delivering large-scale, full-lifecycle implementations for multinational customers dates back prior to the creation of Lingaro.

We combine strength in Business Intelligence (BI) and Data Integration with expertise in development and support. Customers planning larger projects and applications support can benefit from our global delivery capability, spanning the centers in Poland and the Philippines.

Our services

Lingaro provides consultancy, delivers projects end-to-end, and builds selected components as a part of large and very large implementations. We offer a full spectrum of Business Intelligence and Data Integration services which include:

- business requirements solicitation and analysis
- creating the right BI strategy
- Return On Investment (ROI) analysis
- tools evaluation and selection
- project management
- system design
- development
- testing, and
- service support and management

With Lingaro, you will get the right results the first time because we are very good at listening to your needs, we have the expertise in major BI platforms and tools, and because we know how to build practical solutions.

Our capabilities

We have deep expertise in the following platforms and tools:

BI Reporting and Analysis

- OBIEE (aka Siebel Analytics)
- Oracle Sales Analyzer (WebOSA)
- Business Objects
- MicroStrategy
- Microsoft BI
- FastRadar
- open source, e.g. BIRT
- custom developed (Java, XML, Excel)

Data Integration

- Informatica PowerCenter
- IBM DataStage
- Microsoft SSIS
- Oracle Warehouse Builder
- Syncsort
- custom developed (Unix Shell, C++, SQL, PL/SQL)

Database Management Systems

- Oracle (9i, 10g)
- Teradata
- Microsoft SQL Server
- IBM DB2

Schedulers

- BMC CONTROL-M
- Redwood Cronacle
- SLJM

Our capabilities are confirmed by our consultants' certifications and/or by practical experience from full lifecycle BI implementations.

Our methodologies

The methodologies we apply are customized to give optimal results and to suit our client's needs. We are experienced in managing work according to PMI methodology in a CMMI Level 3 compliant organization. Our managers possess the following certifications:

- PMP
- PRINCE2
- ITIL Manager's Certificate in IT Service Management (ITSM)

Our differentiators

- in-depth expertise in Business Intelligence and Data Integration
- experience with multi-Terabyte state-of-the-art Data Warehouses
- highly motivated consultants who get up to speed quickly and perform as of day one

Customer benefits

- **quality** coming from technical expertise
- **speed** coming from industry experience and strong motivation
- **savings** coming from competitive rates and speed of delivery
